SUMMARY

I am passionate about Information Technologies and Software Testing.
Graduated in Computer Science with a Master's degree, I have a work experience of 16 years in computer field, of which almost 9 as a Programmer Engineer.
I am a responsible person, precise, fast in learning, oriented to the result, with teamworking and problem solving.
I speak English fluently and have a knowledge of the Italian language, I am rapidly improving through practice and in-depth courses.
I have advanced knowledge of operating systems and of the hardware.
I have gained specialized skills in bug tracking systems, in content management systems and testing and development tools.
I am interested in working in the IT industry, especially in QA Software Tester role.
